PROFILE

Final-year BCA student (CGPA 8.03) who has built and shipped two end-to-end products: FarmFi, an AI agri-tech marketplace with payments, and Indian Wonderer, a multi-role travel booking platform. Trained a 38-class crop disease CNN reaching 93.2% accuracy and completed a machine learning internship in image classification. Seeking a Junior Full Stack or Python Developer role.

PROJECTS

FarmFi: AI Agri-Tech Platform github.com/Manish9163/FarmFi-an_AI_ecosytem

React, Vite, Flask, MySQL, TensorFlow, Razorpay

- Built an end-to-end agri-tech platform with a React frontend (Vite, React Router) and a Flask + MySQL REST backend, including a farmer marketplace and inventory system.
- Classified 38 crop-disease classes at 93.2% accuracy with a TensorFlow/Keras CNN, and added OpenCV saliency maps so users can see which leaf regions drove each prediction.
- Secured sign-up and checkout by integrating Razorpay payments, Twilio SMS OTP verification, and JWT authentication with bcrypt password hashing.

Indian Wonderer: Travel Booking Platform github.com/Manish9163/Indian-Wonderer-Website

React, TypeScript, Angular, Next.js, PHP, MySQL

- Delivered three apps on one shared PHP + MySQL API: a traveller app (React + TypeScript), an admin panel (Angular), and a guide app (Next.js).
- Prevented double-booking by building a seat map with real-time availability, and added multi-filter search, promo code validation, and a tiered loyalty program.
- Automated refunds with a cancellation flow that calculates refund amounts, and added a review system with category-based ratings.

IoT Traffic Speed Control and Smart Street Lighting Mar 2024

Arduino, IoT, Sensors | Brainware University

- Built a sensor-based speed-violation alert system with solar-powered adaptive street lighting to reduce always-on grid usage.

EXPERIENCE

Machine Learning Intern | Freshosoft Oct 2025 – Dec 2025

- Trained and evaluated CNN image classification models in TensorFlow/Keras and Python, building a preprocessing pipeline (resizing, normalization, tensor conversion) and tuning dense network layers.
- Applied these techniques to a plant disease detection module, contributing to the classifier later used in FarmFi.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, C, SQL
Frontend: React, Next.js, Angular, Tailwind CSS, HTML5, CSS3, Vite, React Router, Context API
Backend: Flask, REST API design, JWT Authentication
Database: MySQL
AI / Machine Learning: TensorFlow, Keras, OpenCV, NumPy, CNN
Tools: Git, GitHub, Vercel, Razorpay API, Twilio API, PWA, MS Office

EDUCATION

Bachelor of Computer Applications (BCA) | Brainware University, Kolkata Jul 2023 – Expected 2027
CGPA: 8.03 (up to 6th Semester) | Coursework: Data Structures, DBMS, Operating Systems, Computer Networks

Higher Secondary Certificate (Class 12, Arts) | Bora Madhusudan High School 2022 | 79%

Secondary (Class 10) | Bora Madhusudan High School 2020 | 29%

LANGUAGES

English (Fluent) · Hindi (Fluent) · Bengali (Professional)
